UNDERSTANDING DEPOPS COMPETITIVE LANDSCAPE

Depop is a community-driven, online marketplace that makes fashion circular, sustainable, and accessible by enabling users to buy, sell, and discover unique, second-hand items.

- ★ Gen Z makes up 90% of active Depop users (30M+ registered users in over 150 countries)
- ★ The global secondhand apparel market is projected to reach \$351 billion by 2027
- ★ In the U.S., 50% of consumers still prefer buying secondhand in person vs online.

Meet our users

Sunny

- ★ 18 year-old college student
- ★ Local to NYC (pop. dense city)
- ★ On a budget
- ★ Experienced In-Person Thrifter
- ★ Browses Depop for hours but takes awhile to make purchases due to choice fatigue and lack of credibility for the item & seller

Katherine

- ★ 29 year-old frequent traveller
- ★ Frequent Depop user
- ★ Visits new cities and wants to find local vintage markets but has no idea where to look
- ★ Currently uses Instagram & Facebook groups to scout pop-ups before landing somewhere new

THE ONLINE VINTAGE EXPERIENCE GAP

- ★ **The Touch Problem** Online shopping can't replicate the tactile experience of vintage, feeling fabric, checking quality, and discovering unexpected finds in person.
- ★ **A Trust Gap** Buyers and sellers of high-value vintage pieces lack the transparency and credibility tools needed to transact with confidence.
- ★ **Choice Overload Endless** scrolling and infinite inventory leads to decision fatigue, leaving buyers overwhelmed rather than excited.
- ★ **Untapped Vendor Network** vintage market vendors aren't on Depop yet, and Depop-sponsored SOOK UK markets remain disconnected from the platform.
- ★ **Thrifting is Social** The real magic of thrifting is the shared experience, going with friends, stumbling on finds together, meeting new people. That's missing online.

“Depop Pop-Ups”

A digital platform bridging Depop's existing SOOK UK partnership with physical vintage shopping experiences.

#1 Discovery Page

Users can find recommended physical pop-ups events near them or based on clothing interests.

Physical Pop-Ups

→ Brings back the tactile, engaging experience online can't offer

#2 Interactive Pop-up Map

Digital map of event with seller information cards (inventory, ratings, price range) with built in GPS navigator. Users can also filter vendors on map by product categories.

Seller Info Cards

→ Builds trust and engagement between buyers and sellers

Vendor Filtering

→ Cuts through choice overload with a curated subset of options

#3 Digital Passport Card

Users have a digital passport where they collect online stamps for every pop-up that they visit.

Passport Stamps

→ Turns shopping into a social, collectible experience
→ Gamifies the shopping experience, increasing consumers need to purchase

Pop-up Sign-up User flow

1. Pop-up Discovery Page

User can browse pop-ups near them

2. Pop-Up Event Details

User sees event details (time, sellers attending, what to expect)

3. RSVP Confirmation

User RSVPs to the event and receives confirmation

Pop-up Navigation User flow

4. Collect Pop-up Passport Stamp

User can collect stamp for attending pop-up

5. Live Vendor Map

Live Map to see active vendors and navigate event

6. Post-Purchase Review

User rates vendor after purchasing

Tradeoffs & Risks

Cannibalization of Online Shopping

Physical pop-ups may overpower online sales and impact business model.

However, physical and online shoppers are largely distinct audiences, limiting cannibalization risk.
Vendor fees from pop-ups also open up a new revenue stream.

Intense Logistical Infrastructure

Physical pop-ups demand close coordination with vendors and venues, poor planning risks financial disorganization and a frustrating user experience.

Depop would establish recurring venue partnerships to streamline future events.

Scaling Events

In-person events are harder to scale since costs and labor grow alongside demand.

However, limited frequency of pop-ups prevents the cannibalization of Depop's core business model.

Measuring success

Adoption Rate

% of users who attend at least one pop-up

Retention Rate

% of users who attend a second pop-up

Gross Event Revenue

\$ Average total revenue per event

Vendor Onboarding Rate

% of Vendors onboarded to Depop

Final Recommendation & Execution Plan

Product Development and Event Preparation

Refine new platform features and UI before beta launching. Organize venue partnerships and event logistics

Phase 1

Phase 2

Soft Launch Platform

Push out new platform for new physical pop-ups to a select few regions for beta testing and gathering feedback.

Phase 3

Expansion of Platform and Pop-ups

Gradually increase regional availability of pop-up markets with platform access. Slow scaling is important and needed.

Phase 4

Post-Launch Monitoring

Constant monitoring of success metrics to track performance of platform and event satisfaction.
