EDUCATION

Carnegie Mellon University

B.S. in Information Systems and Human-Computer Interaction, Minor in Business

GPA 3.60/4.00 | Dean's List

Relevant Coursework: Computer Programming (Python), Data Structures (Java), Database (SQL), Web Design & Development (HTML/CSS), Data Science/Stats (R), Introduction to Accounting, Human-Centered Software, Application Development (Ruby)

Pittsburgh, PA

Expected Graduation: May 2028

PROFESSIONAL EXPERIENCE

Carnegie Mellon Business Technology Group

Product Analyst

Pittsburgh, PA

Jan 2026 – May 2026

- Selected as 1 of 25 from 300+ applicants to join intensive product management group focused on hands-on case studies.
- Recruited and interviewed 14 users across 3 segments over 5 weeks for Perflection AI, an early-stage AI golf coaching startup, achieving 64% onboarding failure rate discovery that directly reprioritized the product roadmap toward a setup wizard before any new feature development
- Synthesized trust and paywall findings across 14 user sessions during pre-revenue to recommend a coach-led GTM pivot and session-based free tier, replacing a 5-swing lifetime cap that 57% of users flagged unprompted as a conversion barrier

R'leyh Software

Software Development Engineer Intern

Bellevue, WA

May 2025 – Aug 2025

- Triaged 30+ daily bug reports in Jira and GitHub Issues to identify critical pain points, driving product decisions that reduced average API response times by 30% for Clairvoy's AI-powered platform.
- Defined requirements and iterated on 5+ features, translating Figma designs into TypeScript and React UI components and collaborating closely with engineering to ship improvements that drove measurable gains in user engagement

University of Washington School of Medicine

Physiology and Biophysics Research Intern

Seattle, WA

Jun 2022 – Jan 2024

- Analyzed over 150 confocal microscopy images of retinal tissue samples weekly using ImageJ, measuring cell density and spatial distributions to support ongoing research on directional motion detection pathways and cellular organization.
- Performed wet lab procedures including pipetting, solution preparation, and antibody staining to process retinal tissue samples.

LEADERSHIP & INVOLVEMENT

Activities Board, CMU Concerts Executive Lead

Jan 2025 – Present

- Manage \$250K annual programming budget for campus-wide concert series, setting success criteria and tracking KPIs including 800+ attendee targets and 95% budget utilization; negotiate with vendors and analyze cost to optimize resource allocation.

Delta Gamma Booth, Structural Booth Chair

May 2025 – Present

- Oversaw structural design of 1.5-story "British Rock Invasion" themed booth for Spring Carnival, managing a team of 70+ chapter members across carpentry while coordinating an \$8K budget for materials, tools, and safety equipment.
- Designed architectural elements in Rhino 3D, creating detailed models of facades, signage, and ornamental components.

TECHNICAL & PRODUCT PROJECTS

Depop Pop-Up Platform Feature | Product Strategy, UX Research, Figma

Nov 2025 – Dec 2025

- Designed a 3-feature solution with a 4-phase go-to-market roadmap, and established KPIs including adoption rate, vendor onboarding rate, and gross event revenue to measure success.
- Identified unmet user needs through competitive analysis of Depop's 30M+ user marketplace, scoping a Pop-Up Platform feature using the CIRCLES framework to bridge online resale with physical vintage shopping experiences.

Database Development Project: Duolingo Case Study | PL/pgSQL, PostgreSQL, MongoDB

Nov 2025 – Dec 2025

- Reverse-engineered Duolingo's database architecture by designing user stories, conceptual/physical models, and building SQL queries to deepen understanding of educational-tech product strategy.
- Administered PostgreSQL database via command line, managing file structure and executing queries to support schema design.

Cut the Rope Term Project | OpenCV, Python

Apr 2025

- Developed and led the implementation of a real-time Python game inspired by Cut the Rope, integrating OpenCV-based hand tracking with custom Verlet rope physics, full UI system, and sound design using CMU Graphics.

SKILLS & INTERESTS

Languages: SQL (Postgres), Ruby on Rails, Python, Java, JavaScript, TypeScript, HTML, CSS

Tools: Rhino 3D, Visual Studio Code, MongoDB, Excel, Figma, Claude Code, Cursor, Word, PowerPoint, AWS, CoPilot

Interests: Building Booth, Live Music & Concert Production, Chess, Dog-Walking, Musical Production
